“ *Connie was my sister and my friend. She was full of fun, generally happy, full of love, and cared more about others than herself. She had a difficult life as she was a Type I (Juvenile) Diabetic since she was 18 months old. Connie far out-lived her estimated lifespan of 14 years. Later in life she also became a Type II diabetic. She lived with pain. She lost the use of her hands. Still deep inside she was full of love. I miss her everyday. I will always love her.*
